1. Childhood essentialism

Susan A. Gelman

1. Childhood essentialism	2
2. What is essentialism and why is it important?	2
3. The role of experience (including culture, context, and identity)	7
4. Language as a uniquely powerful mode of transmission	12
5. Developmental origins	16
6. Consequences for social issues and education	22
7. Conclusions	26
Acknowledgments	29
References	29

2. A secure base script perspective on attachment: Progress, promise, and prospects

Theodore E. A. Waters, Victoria L. Zhu, and Glenn I. Roisman

1. Introduction	40
2. Assessment	41
3. Latent structure	43
4. Antecedents	45
5. Sequelae	48
6. Stability and change	55
7. Conclusion: Promise and prospect	58
References	60

3. Emotion understanding in infants and young children: How input shapes emotional development

Vanessa LoBue, Marianella Casasola, and Lisa M. Oakes

1. Emotional expression	74
2. Emotion regulation	78
3. Emotion perception and labeling	81
4. Mechanisms and cascades	83
5. Conclusions and future directions	90
References	92

4. Autonomic and attentional pathways in the emergence of autism: Bridging mechanisms and real-world contexts in infancy

Jessica Bradshaw, Emma Platt, Julia Yurkovic-Harding, Samuel Harding, and Xiaoxue Fu

1. Developmental cascades and the emergence of ASD	103
2. The role of autonomic nervous system function as an early regulatory mechanism in ASD	105
3. The role of attention as an early regulatory mechanism in ASD	109
4. The coupling of ANS and attention: Autonomic regulation of attention	111
5. ANS and attention: Cascading consequences in ASD	116
6. Multimodal methods in naturalistic contexts: An approach to understanding heterogeneity in ASD	117
7. In-Home studies as a representative and inclusive approach to science	2123
8. Conclusions	126
References	126

5. The sound-of-words model: A developmental perspective of phonolexical acquisition

Thierry Nazzi

1. The "division of labor" hypothesis	136
2. Evaluating the C-bias in lexical processing in adulthood	138
3. Hypotheses regarding the origin of the C-bias	141
4. Evaluating the C-bias in lexical processing in infancy and toddlerhood	143
5. Romance languages	144
6. Germanic languages	146
7. Sinitic languages	147
8. Semitic languages	148
9. The sound-of-words model	149
10. Concluding remarks	153
Acknowledgments	153
References	154

6. Children's ability concepts: Their development, content, and consequences

Melis Muradoglu, Carol Dweck, and Andrei Cimpian

1. The development of children's ability concepts: Change or continuity?	163
2. Beyond having a differentiated ability concept: The organization and impact of children's beliefs about the nature of ability	170

3. Conclusions and avenues for future research	179
References	184
7. The role of parenting in children's math learning: A dual-pathway model	
Eva M. Pomerantz, Jiawen Wu, and Carolyn MacDonald	
1. The role of parenting in children's math learning: A dual-pathway model	194
2. Cognitive and motivational resource parenting pathways	195
3. Antecedents of cognitive and motivational resource parenting pathways	205
4. Implications for educational recommendations and interventions	213
5. Conclusion	214
References	215
8. Assessing children's spatial thinking: Insights, challenges, and implications	
Kiley McKee, Kinnari Atit, and David Uttal	
1. The need for developmental spatial thinking research	224
2. What spatial assessments are there for young children?	226
3. Challenges of children's spatial assessments	232
4. Interim summary	239
5. Implications of children's spatial assessments on spatial-stem research	239
6. Recommendations for future research	242
7. Conclusions	245
Acknowledgments	245
References	245
9. Preparing for equitable family and community engagement through home visiting: Linking culturally responsive/sustaining pedagogy and developmental frameworks	
Judy Paulick and Natalia Palacios	
1. Theoretical frameworks	257
2. Literature review	259
3. Methods and data sources	261
4. Results and implications	263
5. Significance	267
6. Conclusion	275
References	276
